DETAILED ACTION

Claim Objections

Claim 1 is objected to because of the following informalities: the claim contains a spelling error. The noun "wave" should be deleted and the adjective "wavy" substituted. Appropriate correction is required.

Applicant's assistance is respectfully requested in correcting any other minor spelling and/or grammatical errors which may be present in the claims.

Claim 8 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim may depend from other claims in the alternative only. See MPEP § 608.01(n). Normally, claim 8 would not be treated on the merits. But in the interest of furthering prosecution, the examiner states for the record that the claim has been fully examined.

Claims 11 and 12 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The claim from which claims 11 and 12 depend (claim 9) does not encompass salts of the compound of formula [2]. Consequently, the salts of claims 11 and 12 actually expand the scope of the claim from which they depend.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4, 5, and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The diagramed compounds are identified by two separate, bracketed designations. This introduces an unacceptable level of ambiguity into the claim text. For example, in claim 1, the compound of formula [3] is identified as the compound of formula [3], but also as [Chem. 18]. Analysis of the remaining instances in claim 1 and instances in claims 4, 5, and 9 is similar. The examiner respectfully suggests deleting the [Chem. 18], etc. designations.

The remaining claims are also rejected under 35 USC 112, second paragraph, as claims which depend from indefinite claims are also indefinite. *Ex parte Cordova*, 10 USPQ 2d 1949, 1952 (PTO Bd. App. 1989).

Allowable Subject Matter

The subject matter of claims 1-12 would be allowable once the objections and 112 rejections outlined above have been overcome. The following is a statement of reasons for the indication of allowable subject matter:

The key to the instant invention is the novel intermediate compound of formula [2]. The closest prior art appears to be *Journal of Organic Chemistry* (1977), 42(14), p. 2436-2439 (CAPLUS abstract), which teaches structurally

related optically active compounds. Instant compounds of formula [2] are neither taught nor suggested by the cited prior art. The instant process for the synthesis of compounds of formula [3] proceeds through novel compounds of formula [2].
